Fund Objective

To outperform (after deduction of costs) the MSCI ACWI Index, as stated in sterling, by at least 2% per annum over rolling five-year periods.

The manager believes this is an appropriate target given the investment policy of the Fund and the approach taken by the manager when investing. In addition, the manager believes an appropriate performance comparison for this Fund is the Investment Association Global Sector.

There is no guarantee that this objective will be achieved over any time period and actual investment returns may differ from this objective, particularly over shorter time periods.

Investment Proposition

The Fund invests in an actively managed portfolio of stocks from around the world with the intention of delivering significantly higher total returns than the MSCI ACWI Index. We focus on companies which we believe offer above average profit growth and we invest with a long-term (5 year) perspective. The Fund's three dedicated investment managers draw on a combination of their own investment ideas and those of our various investment teams to produce a portfolio that typically holds 70-120 stocks.

Additional Fund Information

The Fund is a sub-fund of the Baillie Gifford UK & Balanced Funds ICVC (Investment Company with Variable Capital) which is an umbrella Open-Ended Investment Company. Its Authorised Corporate Director ('ACD') is Baillie Gifford & Co Limited.

The yields quoted are historic yields based on distributions paid by the Fund in the previous 12 months as a percentage of the mid-market share price, as at the date shown. Investors may be subject to tax on their distributions. The disruption caused by the Coronavirus to global economies, markets and companies could reduce the distributions paid by the Fund in the future.

The ongoing charge figure may vary from year to year and will exclude the costs of buying and selling assets for the Fund (unless these assets are shares of another fund). Further explanation of all the charges and costs relating to this Fund can be found in the Enhanced Disclosure of Fund Charges and Costs document which is available through our website, bailliegifford.com.

Active Share is a measure of how actively managed a Fund is and is calculated by taking 100 minus the % of the Fund that overlaps with the comparative index. An active share of 100 indicates no overlap with the comparative index and an active share of zero indicates a portfolio that tracks the comparative index. We have chosen to show Active Share against the MSCI AC World Index.

Turnover is calculated by taking the smaller figure of either total purchases or total sales for the month and dividing it by an average market value. The Annual Turnover is then calculated as the sum of the monthly turnover figures for the 12 month period.

All figures are rounded, so any totals may not sum.
